“ —

I significantly contributed to the development and implementation of SiAPP. I helped SiAPP transform security officer operations with an innovative app for patrols, guards, encompassing reporting, instructions, panic signals, and attendance. Enabling real-time operational monitoring by a centralized command center in more efficient and responsive way.

— ”

Multi-tenancy Architecture

SiAPP, this cutting-edge project, is built on a **Multi-tenancy** architecture, ensuring scalability, streamlined resource management, and cost-effectiveness for multiple clients while maintaining data privacy and security.

Flower Advisor

floweradvisor.com

“ —

I'm proud to have contributed to the development of one of the largest online flower shops and florists that delivers a variety of flower bouquets, gifts, and parcels throughout Indonesia and even to 100 countries worldwide, with same-day delivery available, Flower Advisor (floweradvisor.com). During my time there, I was responsible for developing existing features, fixing bugs, improving SEO, and ensuring client deliverables.

— ”

Seamless Shopping Experience

FlowerAdvisor.com's architecture offers scalability, multi-language support, user-friendliness, mobile responsiveness, and security for a seamless user experience.

Basecamp

Collect your Audience & Build Community

Basecamp

Collect your Audience & Build Community

“ —

I am proud to share my experience in building a Basecamp to help my clients gather an audience and build a strong community.

Although the project is still in development, I am confident that the Basecamp I am developing will be a valuable tool for my clients to capture potential customers and build their communities.

— ”

Efficient Audience Gathering and Community Building

The way Basecamp works is by directing potential audiences to a lead magnet created with the Basecamp platform. Clients can then follow up with email marketing/promotional campaigns using the audience data obtained from the lead magnet.

“ —

I contributed to the development of an efficient and reliable system for medical record, patient and doctor management, as well as pharmacy inventory management to ensure ease of access, scheduling, doctor availability, and timely medication delivery.

— ”

Revolutionizing Operations: Automating Manual Processes

PMMC played a critical role in automating several previously manual operational processes. These manual processes were often prone to errors and took up valuable staff time, leading to delays and inefficiencies in the clinic's day-to-day operations. With the automation of these processes, staff were able to focus on more important tasks, such as providing quality patient care, without being bogged down by administrative tasks.

Company Profile

Web Company Profile

“ —

I developed a company profile website with a visually appealing design and ensured smooth functionality, including intuitive navigation, responsiveness, and fast loading times. The result is a professional digital presence that delivers an excellent user experience.

— ”

Crafting Engaging Digital Profiles

A company profile website serves as a powerful tool to enhance a business's credibility and build trust with potential customers. It acts as a digital showcase of the company's identity, values, and offerings while increasing brand awareness through an accessible and professional online presence.
